PROFESSIONAL SUMMARY

Full-Stack Developer with 1+ year of experience building and shipping scalable web applications using TypeScript, Next.js, and Node.js. Has owned projects end-to-end from system design and API development to cloud deployment across freelance, part-time, and team-lead roles simultaneously.

WORK EXPERIENCE

Lead Full-Stack Engineer · PowerMySport Pvt. Ltd. Jan 2026 – Present

2-person team · Part-time · Reporting to founder

- Built a 4-app Next.js monorepo (client, shop, admin, community) with a shared Node.js backend handling auth, bookings, notifications, and analytics across all apps
- Integrated PhonePe payments via async webhooks, Socket.IO live notifications, Google OAuth, and Maps API sustaining **99% uptime** in production
- Implemented multi-role access control (player/coach/admin) with JWT, server-side authorization, input validation, and rate-limiting
- Deployed frontends to Vercel (SSR/SSG/ISR) and the API to AWS Elastic Beanstalk with environment-based config management

Full-Stack Developer · Zeerostock Ventures Dec 2025 – Feb 2026

Freelance

- Delivered a B2B wholesale marketplace covering supplier onboarding, product catalog with variants, RFQ/quoting, and order management with admin controls
- Designed relational schemas for buyers, carts, invoices, and RFQs; integrated S3 asset storage with pre-signed URLs and query-level search optimization
- Handed off with full Elastic Beanstalk and Vercel deployment guides and a documented migration pipeline

Full-Stack Developer · Uniquis Edutech Solutions Jan 2025 – Jul 2025

5-person team · Part-time · Reporting to founder

- Developed a student management platform with real-time features (Socket.IO), AI-generated feedback (Google Generative AI), and Razorpay payment integration
- Achieved **99.5% uptime** with Docker and **85%+ Jest test coverage** — zero production incidents in 6 months
- Secured 15+ API routes across 3 user roles using JWT auth, RBAC, and S3-backed file storage

PROJECTS

Ping Pilott — Server Monitoring & Alerting | Node.js, Express, Next.js, MongoDB, BullMQ, Redis, Socket.IO, Docker, Nginx

- Built a server uptime monitoring tool that runs scheduled health checks via BullMQ workers, deduplicates alerts, and sends email notifications — with a live Socket.IO dashboard showing real-time status
- Hardened with JWT auth, RBAC, zod validation, helmet, rate-limiting, and Winston logging; containerized with Docker Compose and served via Nginx reverse-proxy

Social It Up — Digital Agency Platform | Next.js, Firebase, Framer Motion, GSAP

- Agency platform with per-client portfolio routing, an admin dashboard, and a Firestore-backed bug tracker with Kanban-style workflow management
- Animated mobile-first UI using Framer Motion and GSAP; Firebase Auth and automated transactional emails via Nodemailer
